DETAILED ACTION

Claim Rejections - 35 USC § 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaneko et al., "hereinafter Kaneko", (US Pat. 6,800,388 B2).

Kaneko discloses a catalyst composition which comprises: a perovskite composite oxide having the formula ABO_3 and the formula $A'_{1-x}A''_xB'_{1-y}B''_yO_3$, wherein A' is La, Ce or both, A' is at least one element selected from the group consisting of La, Ca, Sm, Ce, Sr, Ba and Pr, B' is at least one element selected from the group consisting of Co, Fe, Mn and Gd, and B'' is at least one element of noble metals, etc. (see col. 18, claim 1). See also Table 3 in col. 15 & 16.

There is no patentable distinction seen between the claimed catalyst and that disclosed by Kaneko, thus the claims are anticipated.

Claim Rejections - 35 USC § 102(b)

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Monceux et al., "hereinafter Monceux", (US Pat. 5,62,680).

Monceux discloses a catalyst containing an active phase of the perovskite-type structure having the general formula: $L_xL'_{1-x}M_yM'_z\Phi_{1-y-z}O_3$, wherein L is an element selected from the lanthanides and the rare earth metals, L' is an element selected from Sr, Ca, Ba, Ce, K, Bi, Rb and Na, M is a transition metal selected from Cr, Mn, Fe, Co, Ni and Cu, M' is at least one metal selected from Pt, Ru, Pd, Rh, etc. (see col. 1, ln 40-57). See also Table II in col. 4, catalyst 9.

There is no patentable distinction seen between the claimed catalyst and that disclosed by Monceux, thus the claims are anticipated.
